A RESOLUTION AT UNIVERSITY

Self Government Is Proposed.

Prof. Porter Would Have Students Enforce Their Own Laws.

Plan Has Been in Successful Operation at the Branch Normal for Five Years.

A scheme which, if carried out, will be the most radical change ever introduced in the State university is now being discussed by the faculty of that institution. The innovation is the establishment of a municipal government in the university That is, to make the student body a corporate one which, to all intents and purposes, will be legal. For years the infersity has been governed and rules by the faculty. Frequent friction in facuity action and more frequent trouble in student affairs has shown that this method is evidently not the best. When Prof. N. T. Porter took charge of the branch Normal school at Cedar City some five years ago he found affairs there in a chaotic state. Students and teachers were ever clashing and faculty meetings were taken up for weeks at a time. Trying to straighten out petty troubles.

Prof. Porter's Remedy.

Prof. Porter's Remedy.

After mature deliberation. Prof. Porter decided that the way to make the students interested in the school was to make them feel they were intrinsic parts in the development of the ansitution. To do this it would be necessary to give them a share, at least, in the school administration. So he tried the plan of nunicipalizing the institution. In general assembly the students elected their mayor, city council, judiciary, police force and other municipal officers. The rules by which they were governed were passed on by the student council. The regulations were enforced by student peace officers, who were charged with that duty. They felt that a breach of the school city's peace was an afternt to their own citticenship.

Tried for Five Years,

Tried for Five Years.

At the Branch Normal this method has been pursued now for five years and there is still a case to be found where any trouble has been expertenced. Now Mr. Porter feels that if preparatory students can be successful in this scheme that college students should experience be difficulty. Thus ever since he begun his work at the university as professor of law and commerce he has been agrating the adoption of his pet plan. Naturally the faculty is very conservative about matters of such import, and as yet has taken no definite steps. But Mr. Porter feels that he will ultimately be successful.

Opposed by Coray.

Prof. Coray is probably the most active opponent of the proposed plan.

"It would be a mere faree," that precessor instated, when asked about it. "Of course," he continued, "the plan is feastble and a good one under different conditions. In our institution the fees are not high enough or other expenses sufficient to make the students appreciate the value of their time and opportunities. This plan is followed in the great Cornell and Columbia law libraries. Here we need a librarian to constantly move about the students enter the law libraries they have a purpose in view. They go to study, not to pass away an hour in conversation. "Why," said the professor enthusiastically, "to you know what would happen to a continued to the propose in the professor enthusiastically a guarter of a mile away.

"Why," said the professor enthusiastically, "do you know what would happen to a cliatterbox there? Every one in the library would hise him, and if that didn't stop his chatter they would actually throw him out."

It is to this failure or lack of existing student spirit that in Prof. Gorav's mind makes the plan impossible. And at the same time Prof. Porter maintains that a nunlcipalization of student affairs will give rise to the necessary spirit.

Condition of the Treasury.

WASHINGTON, Oct. 29.—Today's state-ment of the treasury balances in the gen-eral fund, exclusive of the \$150,000,000 gold reserve in the division of redemption, shows: Available cash balance, \$144,570,-156; gold, \$80,152.88.

Chamberlain's Cough Remedy.

No one who is acquainted with its good qualities can be surprised at the great popularity of Chamberlain's Cough Remedy. It not only cures Cough Remedy. It not only cures Young before being taken from the colds and grip effectually and permanently, but prevents these diseases from resulting in pneumonia. It is also a certain cure for croup. Whocping cough is not dangerous when this remedy is given. It contains no opium or other harmful substance and may be given as confidently to a baby as to an adult. It is also pleasunt to take. When all of these facts are taken into consideration it is not surprising that people in foreign lands, as well as at home, esteem this remedy very highly, and very few are willing to take any other after having ence used it. Six Men Are Hurt in Collision

Charge of Car of Race Horses.

ALBANY, Or., Oct. 29.-Six men were elightly injured and two valuable race horses killed in a rear-end collision between two freight trains on the Southern Pacific near Jefferson today. Five of the injured men were in charge of a car of ten race horses bound for Oak-land, Cal. They are John McCarthy, Salem, Or.; John C. Turner, San Leandro, Cal.; Mike Maione, San Francisco; Herbert Kent, San Francisco, and John Latrass, Sait Lake

Latrass, Sait Lake.

The second section of the freight ran into the first section, which had stopped for wood, telescoping several cars. In one of these were the race horses, belonging to Johnson & Co. and William Reynolds of Great Falls, Mont.

The racer Sailie Goodwin was killed and Clivso was so badly injured that he was shot. Bummer, Suburban, Queen and Stewarders were slightly injured.

TOOK ARSENIC IN DEPOT.

Man Alleges Dowie Is Responsible for Suicide.

KOKOMO, Ind., Oct. 29.—Police authorities have identified the well-dressed young man who took arsenic in the Lake Erie & Western railroad station and afterward died, as Verne Krail, until recently of Zion City, Ill. His father lives at Hoopeston, Ill. In one pocket was found the following letter addressed to a Chicago newspaper: "Will you please put my photo in the paper so my folks can claim me? They do not know where I am. They live near Chicago, I belonged to Dowie's

near Chicago, I belonged to Dowle's church the last two years, but this sum-mer they got hold of my money I had in the bank and they took it out, and I could not get it back. After they got my money they made me leave the church without a cent, and so I am not church without a cent, and so I am not going to try to save any more money. I am going to quit. I have saved up a good deal in the two years and they took every cent. I did not register in my right name. That is the reason I ask you to publish this in the paper. Good-bye and oblige."

Krall had a position of trust in one of the Dowle industries and the handling of considerable money. He had trou-

of considerable money. He had trou-ble on account of an alleged irregular-ity and had been arrested and was to have been tried this month on a charge

AIDED BY HIS BROTHER.

How Boodle Fund of \$50,000 Was Secured in Chicago.

GRAND RAPIDS, Mich., Oct. 29— Lant K. Salsbury, chief witness for the prosecution in the water deal cases, to-day at the bribery trial of ex-Mayor Perry, for the first time named the person who helped him in the duplicate key scheme in Chicago, by which he se-cured an alleged boodle fund of \$50,000 deposited there and belonging to the Bartons of Omaha. Salebury testified that it was his brother, Walter Sals-

BROWN PERIL FEARED.

Butcher Workmen's Union Wants Japanese Shut Out.

CHICAGO, Oct. 29.—The invasion of the American industrial field by Japa-nese laborers is feared by President Donnelly of the Butcher Workmen's union. To head off the Japanese Donnelly will introduce a resolution at the convention of the American Federation of Labor in San Francisco next month calling for the enactment of legislation excluding them from the United States.

The matter was brought to Donnelly's attention by a call made on him by K Okajima, a Japanese, who was as information regarding conditions regarding conditions in the packing plants.

PRISONER KILLED BY GUARD.

Shot Will Attempting to Make His Escape.

DETROIT, Oct. 29.-Frederick Matthews, a general prisoner at Fort Wayne, serving a sentence for deser-tion, was shot and killed by Private Frank J. Hila while trying to escape. Hila was conducting Matthews to the wood pile for his day's work when Mat-thews broke away and ran toward the fence about the fort grounds. Hila or-dered him to stop, and when he falled to do so shot him in the back. Mat-thews lived but twenty minutes.

It is believed at the fort that Mat-thews, who had been despondent for a number of days, made the attempt to escape with the deliberate purpose of escape with the deliberate purpose of being shot by the guard. Last Friday he tried to hang himself, but was dis-covered in the attempt and prevented. He said to Sergeant of the Guard

I am going to put myself out of the way. I am going to try to duck this morning and I hope I will get plunked."

Corinth, Ky., Wiped Out by Fire. LEXINGTON, Ky., Oct. 29.—Corinth Ky., a town of 250 inhabitante twenty-ive miles north of here on the Cincinnati Southern railroad, was almost wiped out by fire tonight. Twenty-one buildings were destroyed. Loss \$60,000.

Danish Cruiser Sails.

COPENHAGEN, Oct. 29.—The Danish cruiser Heimdel, which followed the Russian Baltic fleet during Danish waters, sailed October 28 for Bilbon, where it is understood she will await orders.

Not a Miner **Escaped Death**

One a Salt Laker, Who Was in Every One in Colliery at Teroio Was Killed by Explosion in the Mine.

> TRINIDAD, Colo., Oct. 29.—The Rocky Mountain Coal and Iron company's mine No. 3, at Terolo, forty miles west of this city, was so badly wrecked by the explosion which occurred yesterday that the rescuers have not yet succeeded in penetrating to the point where the miners were working.

Twenty to Sixty Dead.

Estimates of the number of men in he mine at the time vary from twenty to sixty. They are foreigners, with the exception of four.

The mine company's officials have no record of the number working, though went into the wine yesterday morning. According to reports which have not been verified, many more men went in-to the mine in the afternoon.

None Are Now Alive. It is regarded as certain that none of

these who were in the mine when the explosion occurred are now alive The mine is a sloping tunnel, over 2000 feet long. Rescuers entered the slope as far as room 13, which is 200 feet from the mouth of the tunnel. They succeeded in reaching this point only after the most dangerous work and after crawling through many narrow places. At this point they encountered a solid wall of rock that had fallen from above and clered the services. closed the passage

Cannot Reach Bodies.

Room 26, where most of the miners are supposed to have been working, is 600 feet from the mouth of the tunnel, or 400 feet beyond the point to which the rescuers penetrated. Only one body has been recovered, that of T. Doran, a driver, who was just entering the tunnel when the explosion took place, and who was terribly burned.

"The report that sixty men were in the mine at the time of the explosion is untrue," said Coroner Sipe, after vis-iting the scene of the accident. "I believe that there are twenty en-tombed in the mine, and that all are dead."

Was Due to Dust.

"I think the explosion, which caused the roof of the mine to cave in, was a dust explosion. The mine is well ven-tilated, without artificial devices." There were only two Americans in the mine. George Brandenburg and John Hatton. The others were Slavs and

Mexicans. Company officials deny that there were more than twenty-one men in the mine at the time of the explosion, but miners have today estimated the number miss-ing at sixty-eight.

Crash Was Terrific.

The crash was so terrine.

The crash was so terrine that it was heard for miles, and the vibrations were distinctly felt at Newton, twelve miles away. It seemed as if an earthquake had occurred, so violently did the earth fremble. Smoke, dust and dirt were blown from the tunnel and air shaft in heavy black clouds.

Showered With Stones.

Broken timbers, huge chunks of coal and blocks of all sizes were buried hundreds of blocks of all sizes were builed hundreds of feet from the portal of the big bore and fell on and around the tipple that stonds directly opposite the mine. People who were near the mine were showered with skind, stones and dirt. Some of the stones landed fully a quarter of a mile away.

Efforts to Recover Bodies.

The mine is completely wrecked. A great fall of rock blocked the entrance and it took nearly all day to block up the pit mouth sufficiently to permit rescuers to venture inside. Almost every prop was blown from the side of the mine and the whole entry was blocked by huge rocks. The mine is on what is known as a pitching vein and there is only one entry, a tunnel running along near the base of the mountain.

Forty-Nine Entombed.

B. B. Fife Coroner of Las Animas county, returned from Terolo tonight and stated that, to the best of his knowledge, there are forty-nine miners entombed in mine No. 2, where the explosion of Friday mine No. 3, where the explosion of Friday afternoon occurred. After obtaining a list of the names of the men employed at the lil-fated mine, Coroner Fife, with his assistants, made a house-to-house canyans of the Terolo camp. Upon making comparisons, the Coroner declares it to be his firm conviction that the above number of onliners was caught in No. 2 at the moment of the explosion.

Bodies Identified.

The bodies of the three victims which were recovered late this afternoon were identified tonight as those of Charles identified tonight as those of Charles Brandenberg, Edward Hadden and Frank

Tragedy at World's Fair.

CATARRH

Gentlemen :- I wrote you some time ago, giving you an account of my suffer-ings with an awful case of Catarrh. I had all the symptoms that accompany this disease, such as mucus dropping in the throat, a constant desire to hawk and spit, feeling of dryness in the throat, cough and spitting upon rising in the morning, scabs forming in the nose, which required much ef-

fort to blow out; sometimes causing the nose to bleed and leaving me with a sick headache. I had thus suffered for five years. As soon as I heard from you, I commenced to take S S S as you advised, and after I had taken three large bottles, I noticed a change for the better. Thus encouraged, I continued to take it, and in a short while was entirely cured, 224 Rardolph St., Richmond, Va. JUDSON A. BRLLUM.

I contracted Catarrh and suffered terribly with it for 25 years. It was so bad that I had lost my hearing, sense of taste, that I had lost my hearing, sense of usite, as well as being nearly blind. I tried various medicines and specialists, spending a large sum of money with them, but with no perceptible results, so I abandoned all other remedies and doctors and began using your S. S. S. I took three large bottles and one small bottle, when much to my joy I found myself a well man. All bottle, when much to my joy I found myself a well man.

my senses were fully recovered, and after fifteen years I am happy to relate that I have never had the slightest return of the aliment. I am now 75 years old and enjoy good health for my age. I theerfully and gratefully recommend S. S. S. as the remedy that cured me of Catarrh.

Forders Ark L. S. LOCHRIDGE. Fordyce, Ark.

If winter is to be dreaded for its snows, icy, cutting winds and damp, unpleasant weather, it is more to be dreaded because it brings with it the most annoying and disgusting of diseases—Catarrh. The changed condition of the weather brings on "bad colds" which irritate the inner skin and tissues, and they secrete an unhealthy matter that is absorbed by the blood and scattered all through the system in its circulation, and at the first sign of winter the patient begins to "hawk and spit." All the mucus membranes and tissues of the body are affected by this disease, and the filthy, poisonous matter finds its way to every part of the body, making the sufferer dull and half sick all the time. The head and eyes have blinding aches, the stomach bloats, the hearing is often affected and in its worse forms the soft bones of the nose and head are destroyed. Local ap-

plications such as sprays, washes and inhalations can do no more than give temporary relief, because the blood is constantly circulating through the system loaded with these fifthy catarrhal poisons, and it must be purified and cleansed before a cure can be effected. S. S. S., a purely vegetable remedy, cures Catarrh by its invigorating, purifying action on the blood, and the catarrhal poisons are carried off through the proper channels. S. S. S. makes the blood rich and the unbelthy received the system it carries healthful properties to the organs and tender tissues, the unhealthy secretions cease, and the whole system is renewed and built up by it. Don't let a "bad cold" become chronic Catarrh, but at the first symptom begin the use of S. S. S. and fortify the system against it. Our book on The Blood will be mailed free, and our physicians will give special advice to all catarrh sufferers who
